

PRINCIPLE *to* PRACTICE

Management Commitment & Visibility

- Attend daily safety pre-planning meetings.
- Lead weekly safety audits and assessments.
- Participate in incident investigations.
- Follow up and track safety corrective action to completion.
- Initiate improvement on injury and audit trends.

Employee Involvement

- Promote easy ways to report safety hazards.
- Enable safety teams and safety champion programs.
- Encourage employees to approach others.
- Support participation with safety audits.
- Utilize employee mentoring programs.

Worksite Analysis

- Execute an effective weekly safety audit process.
- Investigate near misses, first aid, and recordable accidents.
- Anticipate risk with pre-task planning processes.
- Inspect equipment systematically.
- Analyze injury and audit trends.

Training & Communication

- Deliver effective new hire safety orientations.
- Provide effective training for all required regulatory topics.
- Equip supervisors and managers with safety leadership training.
- Communicate hazards with consistent weekly safety topics.
- Promote safety strategically with banners, posters, and key messages.

Prevention & Controls

- Develop an annual strategic safety plan with clear goals and objectives.
- Maintain all appropriate regulatory programs.
- Facilitate an effective corrective action program for safety issues.
- Implement an aggressive injury case management program.
- Perform an annual review on programs, goals, and objectives.
